

Well, now you want to force more laws on us about what we can listen to. It is my choice to listen to satallite radio and it is none of your business to get involved. This is Americe and you need to butt out! I am so tired of government telling us what we can watch and listen to. If someone doesn't want to listen all they have to do is shut it off. You need to start listening to the people instead of the big corporations lining your pockets. I am a voter and I will vote against anyone trying to take away anymore of our rights!!!!!!1
